Assignment 5.2

Andy is my fiance and the subject of the bioSite I'll be creating. Here's his biography:

Andy was born in Omaha, Nebraska and lived in Plattsmouth, NE for the first year of his life. His family moved to Millard (Omaha), where he attended Millard public schools before graduating from the University of Nebraska at Omaha in 2012 with a B.S. in Communications, focusing on Broadcasting and New Media. While his professional path has largely been in warehousing and inventory management, music has always been the deeper throughline of his life.

From his earliest memories, Andy was singing, humming, and inventing little instrumental worlds while playing with toys. Music became something more intentional and expressive in his teenage years, around age sixteen, when it began to feel like a place where his inner life could exist more fully. He taught himself guitar and started experimenting with songwriting. Since then, he has been involved in numerous bands across Omaha and Lincoln, including Family Picnic, House Vacations, And How, B.B. Sledge, and currently Strange Pain. B.B. Sledge, released a full-length album in 2025, composed of all-original songs written by Andy.

Andy's creative influences span decades and mediums. His musical touchstones range from the melodic invention and irreverence of The Beatles to the tenderness of Belle & Sebastian, the raw energy of Sleater-Kinney and the immersive, emotional worlds of video game composers like Koji Kondo and Miki Higashino. He has a particular fondness for retro video games. While they are profoundly nostalgic for him, they also weave together music, story, and striking visuals. The marriage of these elements inspire Andy to supplement his live musical performance with other visual elements, like atmospheric lighting, projections and animation.

In his quieter moments, Andy enjoys revisiting old games and watching comedies and science fiction. At his core, he describes himself simply and sincerely: kind, peaceful, and open.

INTERVIEW WITH ANDY

Where were you born?

Omaha, NE

Have you always lived in Nebraska?

Yes

Did you ever imagine yourself somewhere else?

Yes

What did you study in college?

Communications: Broadcasting (New Media)

What did your parents do for a living?

Dad was a railroad laborer, mom worked at a printing factory and did some fast food work
intermittently

When did you start loving music?

Early as i can remember, was always singing/humming instrumentals while playing with my toys

When did you start making music?

Toddler days, as stated above, however, making music I actually felt was a bit more
expressive/somewhere close to the wholeness of my heart... about age 16

What else do you like to do in your spare time?

Play retro video games, watch some comedy/sci-fi TV, some anime, not much else really

Top ten video games?

In no particular order:

Secret of Evermore

Secret of Mana

Illusion of Gaia

Earthbound

Metroid and Super Metroid

Chrono Trigger

Suikoden I & II

Tribes Ascend

Final Fantasy Tactics

Super Mario World

Top ten musical artists (and why)?

Not sure if I have 10, but I'll give it a shot.

The Beatles - Perfect blend of chops, quirk, catchiness, irreverence, and adherence

Arcade Fire - Layers of high school/early college nostalgia, but also, cool songs, nice textures/dynamic moments

Belle & Sebastian - Great melodies, powerful tenderness floating on top of a perfect rhythm section

Brian Jonestown Massacre - Their dedication to the continuum of rock'n'roll

Chuck Mangione - That Feels So Good record really does. Pretty freakin' perfect. Chill, uplifting, relaxing, and joyful in ways that defy verbal articulation.

Koji Kondo - Created some of the greatest arrangements I've ever heard, so moving

Sleater-Kinney - Rippin' guitars, powerful vocal blasts, drums spot-on in line with songs, hugely important group

The Pillows - Best of Japanese rock. Devout Beatles enthusiasts, great ideas, wild execution, fantastic band

Miki Higashino - Composer of Suikoden soundtrack - A game so dear to my heart, the music will live with me for the rest of my days

Tom Petty and the Heartbreakers - Great songs that feel emotionally earnest and, when dramatic, dramatic in a way that expands the perceived truthfulness gathered during of the experience of listening

What do you want the world to know about you?

I am kind and peaceful and have a creative catalogue you're welcomed to explore.

LANDING PAGE CONCEPT

Andy is a prolific musician and songwriter, so I wanted to create a theme inspired by his passion for creating music. This website will resemble digital audio workstation (DAW). Instead of instrumental tracks, each "track" (row in a grid) will be a section of the website. The color palette of the site will resemble colors typical in a DAW.

Four rows of a grid layout will represent four sections of the website: Andy's bio, his hobbies, a photo gallery, and external links to his various music projects. To the left of the section titles will be two buttons: "M" and "S". In DAWs, "M" stands for "mute" and "S" stands for "solo" and are used to mute or isolate a specific instrumental track. The "M" button will collapse a section and the "S" button will expand.

Each row of the grid will have a background image. The image will resemble an audio track in a DAW. When the section expands, the image will adjust and expand with it and text will appear.

SITE STRUCTURE OUTLINE

I. H1 Heading with embedded Bandcamp player and "An Introduction to Andy Cubrich" text

II. Body: CSS Grid Layout - 4 expandable rows, H2 headings

1. Andy's Bio

a. Text wrapped with p tag

2. Andy's Hobbies

a. Text wrapped with p tag

3. Photo Gallery

a. CSS Grid Layout

4. Links

a. External links to Andy's musical projects

i. Unordered list
